RESUMO

I have studied and developed for more than 4 years and have started I.S. (Information Systems) in 2016. I am always studying online courses on sites like Udemy, Alura and others. The most of my career was with sustentation, but I have already worked with systems from scratch, bridge-to-bridge(from database architecture, to frontend and deploy), mostly with .NET core, from 4.0 to latest version 8.0, as well as C#. I'm not a single language developer, I love all the frameworks we have in our developer stack. I am passionate about what I do!

EXPERIÊNCIA

BRQ Solutions, São Paulo — MID FULL STACK DEVELOPER .NET

October 2022 - May 2023

IDEs: Visual Studio

Development techniques: SOLID, Design Patterns (Factory, Injeção de Dependência), MVC

Versioning: Git, GitLab

SGBDs: SQL Server Management Studio

Process: Kanban, Squads, Agile

Stack: .NET, .NET Core, .NET Framework, Blazor, Javascript, JQuery

Activities: I've worked with .NET in sustentation of the intern platform, with a team structured by activities (development, DevOps, Database and Architecture), and also made development of new features, according to business rules of the company. It is worth mentioning the construction of a Rest API with Salesforce CRM, that i could contribute to its development, with algorithms and tests. The frontend was in Blazor, working with HTML, CSS(Bootstrap) and Javascript(JQuery, Ajax).

Qodeless, São Paulo — MID FULL STACK DEVELOPER .NET

August 2020 - August 2022

IDEs: Visual Studio, Visual Studio Code

Development techniques: SOLID, Clean Code, Design Patterns, TDD, DDD, MVC

HARD SKILLS

Programming Logic - Pleno

Data structure - Pleno

Algorithms - Pleno

C# - Pleno

.NetCore - Pleno

.Net Framework - Pleno

SQL - Pleno

Python - Júnior

Javascript - Pleno

COURSES

Desenvolvimento web com

Javascript - Básico ao

avançado - Udemy - 94 horas

C# completo - Básico ao

Avançado - Udemy - 38 horas

LANGUAGES

English - Advanced

Spanish - Basic

Versioning: Azure, Git, TFS

SGBDs: Oracle, PostgreSQL, MongoDB

Servers: Linux, Nginx

Process: Agile, Scrum, Kanban

Stack: SQL, C#, .NET Core, .NET Framework, React.js, Javascript, C++

Activities: As mid developer, i've leaded the backend development of a CRM project for a real state, making the database architecture and serving as tech leader of backend for the team, also supported the frontend with React.js. I've also worked with a engineer process control system, developed with C++, and Oracle database.

Qodeless, São Paulo — JUNIOR FULLSTACK DEVELOPER

Junho de 2019 - Agosto de 2020

Resume of Technologies:

IDEs: Visual Studio, Visual Studio Code

Development techniques: Design Patterns, SOLID, Clean Code, MVC, DDD, TDD, Rest, JSON

Versioning: GIT, GitLab, TFS, Azure

SGBDs: PostgreSQL, Oracle DB, Azure

Servers: Linux, Nginx

Process: Agile, Scrum, Kanban

Activities: I worked as single fullstack developer on a project in .NET core, from database to deploy, with occasional support of a specialist. As the calls with the clients occurred, i was making the kanban and developing the corrections and new features requested by the client. I've also worked with algorithms for financial reports in C#, to output in MSOffice Excel. I've learned about databases, back and fron-end and architecture.

Mobile development with Phonegap Cordova and .NET core in the backend;

Rest APIs development;

Very much pair programming.

EDUCATION

Centro Universitário Eniac, Guarulhos — Graduation

January 2016 - December 2020

Course - Bachelor in Information Systems

Francisco Milton de Andrade, Guarulhos — College

January 2010 - December 2010
